publication list has not been verified by the department.

Publication list has not been verified by the department.
Huizhen Zhu, Applications of polyamidoamine dendrimers in polymer electrolyte membrane fuel cells. (D)
Huijuan Zhu, Preparation of new crosslinking agents and additives for use in polymer electrolyte membranes (PEMs) for fuel cell applications. (D)
Haiyang Wan, The photochemical reduction of dendrimer-mediated metal ions. (D)
John O. Hauptfleisch, Synthesis of trifluoronitromethane, CF3NO2: Photochemical scale-up and a new thermogeneration method with a refined purification technique. (D)
Qingmei Chen, Towards environmentally friendly fabric treatment agents. (D)
Yangliu Zhou, Preparation of new crosslinking agents and additives for use in polymer electrolyte membranes (PEMs) for fuel cell applications. (D)
