Omar De Paoli. Synthesis of N-heterocycles via heterogeneous catalytic domino approaches. (M)

Valentina Anatasova. Environmentally benign oxidative self-coupling of benzylamines with anilines: A synthetic and mechanistic study. (M)

Alessandra Rudnitskaya. Applications of quantum mechanics and molecular mechanics in understanding of organic reaction mechanisms and ligand-protein interactions. (D)

TOROK, MARIANNA (b.1967) Assistant Professor. M.S., 1996, University of Massachusetts, Amherst, MA; Faculty of Science, Szeged, Hungary; Ph.D., 1997, University of Szeged, Faculty of Medicine, Szeged, Hungary. Postdoctoral Research Associate, 2000-2002, University of Southern California, Los Angeles, CA; Postdoctoral Associate, 2005-2007, Massachusetts Institute of Technology, Cambridge, MA. Biochemistry; Biophysics/Physical Chemistry. Research Interests: physical biochemistry, medicinal chemistry, protein structure and dynamics, biophysical applications of electron paramagnetic resonance spectroscopy, free radicals, protein misfolding and amyloidogenesis, Alzheimer’s disease, amyloid-beta peptide, microwave-assisted peptide synthesis. TEL: (617) 287-6199 FAX: (617) 287-6030 Web: alpha.chem.umb.edu/faculty/mtorok/

Email: marianna.torok@umb.edu

Z. Zhang. The development of new mass spectrometry method for screening inhibitors of amyloid-beta peptide oligomerization. (M)

ZHANG, WEI (b.1961) Associate Professor. B.S., 1982, Nanjing University, Ph.D, 1993, University of Pittsburgh; Research Assistant Professor, 1993-1995, University of Pittsburgh; Associate Professor, 2008-, University of Massachussetts Boston. Organic Chemistry. Fluorous chemistry; synthetic free radical chemistry; medicinal chemistry; combinatorial chemistry; green chemistry; diversity-oriented synthesis; microwave-assisted synthesis; multicomponent reactions; asymmetric synthesis and chiral separations; compound library synthesis and purifications; synthesis of natural product analogs. TEL: (617) 287-6147 FAX: (617) 287-6030 Web: alpha.chem.umb.edu/faculty/wang/code/index.htm Email: weizi.wang@umb.edu
