OLAKKAD UNIVERSITY

OAKLAND UNIVERSITY

Oakland University. Research, 1-500-44th-477. TEL: (248) 370-2347
FAX: (248) 370-2321
Web: www.oaklandu.edu/chemistry
Email: abull@oakland.edu
Department of Chemistry
Dr. Arthur W. Bull, Chair and Professor.

Degrees Offered: B.A, B.S, M.S, Ph.D.

Fields of Specialization: Chemistry (M.S.) Health and Environmental Chemistry (Ph.D.).

Interdisciplinary Program: Biological Communications, Ph.D. (Department of Biological Sciences), Medical Physics, Ph.D. (Department of Physics).

ARI, SITARAMAYYA (b.1945) Professor. B.Sc, 1965, Andhra University—India; M.Sc, 1967, Lucknow University—India. Senior Scientific Assistant, 1973, Industrial Toxicology Research Center-Lucknow, India; Research Associate, 1974-1975, Philips University-West Germany; Research Associate, 1976, Centre de Neurochimie-Strasburg, France; Research Associate, 1977-1979, University of Bioclimatologie-Indus, France; Distribution of lead in the Clinton River Watershed, Michigan. J. Great Lakes Res, 36, 606-617 (2010).

DEMBERNIK, ROMAN (b.1959) Associate Professor. M.S, 1989, University of Technology; Ph.D, 1993, Polish Academy of Sciences. Research Associate, 1995-1999, University of Utah. Organic Chemistry; Organometallic Chemistry. Synthetic organic, fluorine-, medicinal, and organometallic chemistry. In particular cyclodomolosyntheses, electrophilic cyclizations, syntheses of modified nucleosides and alkyn chemistry. TEL: (248) 370-2248 FAX: (248) 370-2231 Web: www2.oakland.edu/chemistry/Email: dembner@oakland.edu

EMERSON, PETER (b.1947) Professor. B.Sc, 1969, University of California, San Diego. NIH Postdoctoral Fellow, 2001-2005, University of California, San Diego. Biochemistry; Biophysics; Biotechnology. My research has focused on developing new experimental and computational methods to study protein folding and aggregation. My graduate work has investigated the folding and aggregation of the protein interleukin-1beta. My post-doctoral work has developed computational modeling methods and FRET experiments for protein folding and aggregation. TEL: (248) 370-0288 FAX: (248) 370-2321 Web: www2.oakland.edu/chemistry/faculty.cfm?

FINKE, JOHN MASON (b.1973) Assistant Professor. B.A, 1993, Claremont-McKenna College; M.S, 1998, University of California, San Diego; Ph.D, 2001, University of California, California. Nih Postdoctoral Fellow, 2001-2005, University of California, San Diego. Biochemistry; Biophysics; Biotechnology. My research has focused on developing new experimental and computational methods to study protein folding and aggregation. My graduate work has investigated the folding and aggregation of the protein interleukin-1beta. My post-doctoral work has developed computational modeling methods and FRET experiments for protein folding and aggregation. TEL: (248) 370-0288 FAX: (248) 370-2321 Web: www2.oakland.edu/chemistry/faculty.cfm?ID=5493
