

Sherry, A. Dean (b 1945) Professor of Chemistry.
B.S, 1967, Wisconsin State University, LaCrosse; Ph.D, 1971, Kansas State University. Comprehensive metabolite analysis for understanding of disease mechanisms, Jimin Ren, A. Dean Sherry and Craig R. Malloy, 1H MRS

Sherry, A. Dean (2009). Inorganic Chemistry/Bioinorganic Chemistry, University of Texas at Dallas. Materials Science. Polymer Science. Research interests include synthesis, mechanism, structures/property relationships, and applications of polymeric materials and composites: fluoro polymers from aromatic trifluoro vinyl ethers and other fluoroelens for optical energy conversion, and tailored surface applications; polymer networks and carbon structures from micro and nano processable intermediates via bis-ortho-diyne monomers and co-polymers; and the synthesis of perfluorocarbon fiber precursor polymers. Tel: (972) 883-2782 FAX: (972) 883-2925

Email: swherry@utdallas.edu

Chair and Professor of Chemistry, 2010-, University of Texas at Dallas. Project Leader, 1996-98, Dow Chemical Central Research, Germany; Senior Research Scientist, 1994-96, Dow Chemical Central Research, Germany; Assistant Professor of Chemistry, 1998-2001, Clemson University; Associate Professor of Chemistry, 2001-2006, University of Texas at Austin. NIH Postdoctoral Fellow, 1992-1995, Northwestern University. Inorganic Chemistry, Molecular Magnetic Resonance Imaging. (M)
